DXN Navigator

Monitor, manage and control your mission critical data centre environment from a single dashboard – DXN Navigator helps you make the right decisions.

Reliability, security, connectivity, flexibility and availability are all the characteristics of modern edge data centre facilities like DXN's. But there is one more characteristic that's needed - visibility. To manage your infrastructure proactively, environmental information on power, temperature, humidity is needed (both historically and real time) so you can make informed decisions. DXN Navigator is DXN's DCIM (data centre infrastructure management system) and provides this functionality and more to help you get the best out of your IT investment – all through via a simple configurable interface. No visiting site, logging tickets or time consuming travel required.

DXN Navigator provides all this information and more in real time with extended logging capabilities to help you analyse and detect issues before they become a problem. Even better is that you can access the portal from a computer or mobile device, so you have insight, control and peace of mind wherever you are at any time of the day.

The DXN Navigator portal provides an impressive range of features including:

Measurement & Control
- Rack power (2 x Power Feeds) – real time, historical, trending
- Temperature – real time & historical
- Fire suppression status for the modules where your racks are located

Access & Security
- Staff access control management – full functionality to manage staff and contractor security to your racks
- Security CCTV video feeds for full modules
- Security CCTV retention for available for extended periods
- Access control logs for your racks and modules
- Ability to define different access profiles and allocate to specific staff and contractors
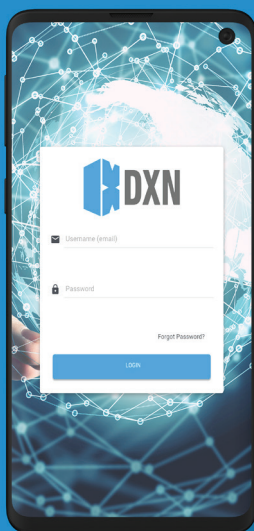

Reports & Alerting
- Alerting on alarms
- Reporting on measured parameters and thresholds
- Automatic report scheduling – access via portal or email
- PUE analysis
- Data export to analysis tools

User Management
- Lodge, review and check support and service request tickets
- View your invoice history
- View your service portfolio

*Even further value can be added by combining **DXN Navigator** with **DXN Support Services**.*
